Social Hour - Team 85

Key achievements in the last week

- Nearing completion of the calendar interface within the application (80%)
- Full integration of Google calendar
- Established colors for the applications theme
- Fixed small bugs within data storage and application functionalities

Key planned activities for the next week

- Slight adjustments to finalize the calendar interface within the application
- Continuation of testing (integration, java/xml component tests)
- Changing and implementing the application color theme
- Continue code optimization (Java)
- Outline of user manual
- Continue code documentation

Project Metrics	Status
New Issues/Risks Captured	G
Scheduled Tasks	G
Issues/Risks Resolved	G
Stakeholder Management	G

Overall Status

G

Plan to keep/get project to Green status

- Strictly work by/follow our Gantt chart and list of tasks
- Frequent meetups out of class to work on application
- Performance testing with individual components
- Continue updating schedule relevant to work that has been completed
- Continue collaborating with lab instructor/TAs

Key risks / issues / scope changes

- Google Calendar Authentication currently taking longer than expected to load
- Finding substantial amount of Android users and distributing the application
- Acceptance of the application
